Vegetatio **96**: 195–196, 1991.

Volume contents

Ratyńska, H. & W. Szwed, Clearing communities in the Wielkopolska region (mid-western Poland) and a study of forest regeneration 1
Wang Yusheng, Zhao Nishan & Xu Zhongru, The relationships between primary production and the major ecological factors and its prediction models in *Stipa baicalensis* steppe in Northeastern China 15
Kojima, S., Classification and ecological characterization of coniferous forest phytogeocoenoses of Hokkaido, Japan 25
Newbery, D. McC., Floristic variation within kerangas (heath) forest: re-evaluation of data from Sarawak and Brunei 43
Reetu Sharma & K. M. M. Dakshini, A comparative assessment of the ecological effects of *Prosopis cineraria* and *P. juliflora* on the soil of revegetated spaces 87
Book reviews 97
Short reviews 100
Kaitala, S., V. N. Maximov & Å. Niemi, A simple approach to estimate similarity in ecosystem analysis 101
El-Ghareeb, R., M. A. Ayyad & M. S. Gaballah, Effect of protection on the nutrient concentration and uptake of some Mediterranean desert annuals 113
Slater, F. M., A. Hemsley & D. M. Wilkinson, A new sub- association of the Pilularietum globuliferae Tuxen 1955 in upland pools in the mid-wye catchment of central Wales 127
Gratani, L. & M. Amadori, Post-fire resprouting of shrubby species in Mediterranean maquis 137
West, N. E. & A. Reese, Comparison of some methods for collecting and analyzing data on aboveground net production and diversity of herbaceous vegetation in a northern Utah subalpine context 145
Benito, I. & M. Onaindia, Biomass and aboveground production of four angiosperms in Cantabrian (N. Spain) salt marshes 165
Fuls, E. R., The effect of nutrient enriched sediment deposits on the vegetational traits of a patch-grazed semi-arid grassland 177
Stampfli, A., Accurate determination of vegetational change in meadows by successive point quadrat analysis 185
